Direct Enrolment

What You'll Learn

Gain hands-on training in human-centered design principles through user research, personal development and usability testing, trending industry tools like Figma and Mira and a comprehensive understanding of UX structure and communication, including interaction design, information architecture and UX writing.

01 / Fundamentals of User Experience Design

Discover the essential methods and tools of user experience design and core concepts like usability, accessibility and human-centered design. Engage in hands-on research techniques and develop skills in managing stakeholder relationships, communication and presentation.

02 / User Experience Design Research

Gain essential skills in planning and conducting user research for UX design. This course covers foundational research methods and strategies, how to develop effective research plans and lead insight-driven sessions.

03 / User Experience Visual Design, Prototyping and Wireframing

Create effective user interfaces by defining content hierarchy, navigation structures and layouts through information architecture and user flow diagrams. Develop expertise in creating high-fidelity mock-ups and interactive prototypes to simulate user interactions.
