

Certificate in DevOps

Gain the technical and strategic skills to streamline software delivery, enhance collaboration and drive continuous innovation.

SEPT 21, 2026 6 Months Part-Time Blended (Online) \$3,950 CAD

Skills You'll Gain

- DevOps Foundations
- Building Scaleable DevOps Pipelines
- Infrastructure as Code
- Real-World Applications
- Software Development Life Cycle (SDLC)

Prepare for Roles Like

- DevOps Engineer
- Infrastructure & Operations Lead
- Site Reliability Engineer

Admission Requirements

- Direct Enrolment

This program will equip you with a strong foundation in software development and IT operations, while emphasizing automation, collaboration and continuous delivery. You will gain key skills that you can apply to today's digital-first organizations. You will also gain access to the **PeopleCert DevOps Foundation** exam voucher and work toward a certification that adds credibility to your skills.

What You'll Learn

01 / Introduction to DevOps

Understand the new world of DevOps and how DevOps is adopted in an organization's transformational journey. This course covers the key concepts, strategic objectives and methodologies.

02 / The DevOps Toolchain in Practice

Build upon the concept of DevOps and its importance in modern software development through application of various tools. Work with source code management (Git) to integrate and build continuous integration and deployment pipelines, enabling automated deployments of software meeting the quality rigour defined by a software team.

03 / Next Generation DevOps

Build detailed knowledge about next generation DevOps and its role in digital transformation, through real-world case studies. You'll receive hands-on experience utilizing public cloud infrastructure as a service (IaaS), including Amazon Web Services (AWS), Microsoft Azure and Google Cloud Platform (GCP).
