What You'll Learn

This program is built for professionals entering the product space or growing into product-focused roles. Graduates will fully understand the product lifecycle from ideation to completion, be able to identify user needs and align them with business goals, and prioritize product features and manage roadmaps.

01 / Introduction to Product Management

Understand the key concepts, methodologies and tools that help product managers successfully build and ship products that solve real customer problems.

02 / Data Analytics for Product Managers

Understand how data can be used to support product and business decisions. This course covers the common frameworks, business scenarios and storytelling fundamentals for students to be able to influence organizations.

03 / UX Design for Product Managers

This course focuses on the business value of design, along with its key concepts and processes as they relate to creating products and services for the 21st century.

04 / Applied Product Management Capstone

Gain experience as a product manager and the opportunity to apply the knowledge gained in the first three courses to a real-world project.
